*Modern **Wi-Fi** baby monitor*

The Neno Orso modern Wi-Fi baby monitor is a must-have for every parent. Thanks to the camera, you can monitor the room while you are anywhere. All you need is your phone at hand! In addition, the device sends you a notification whenever it detects movement or sound, allowing you to react immediately. It's the perfect solution for comfort, peace of mind and a sense of closeness regardless of distance.

Instant notifications

Hear every sigh and see every activity of your little one! The baby monitor detects sound and movement and immediately sends a notification to your phone. This way you always know what's going on. Whether you are in the next room or out of the house, you can react in good time.

Two-way communication

Soothe a baby with your warm voice or speak at any time. The built-in microphone and speaker provide excellent sound quality, allowing you to stay in touch with your little one.

*Create **photos and videos***

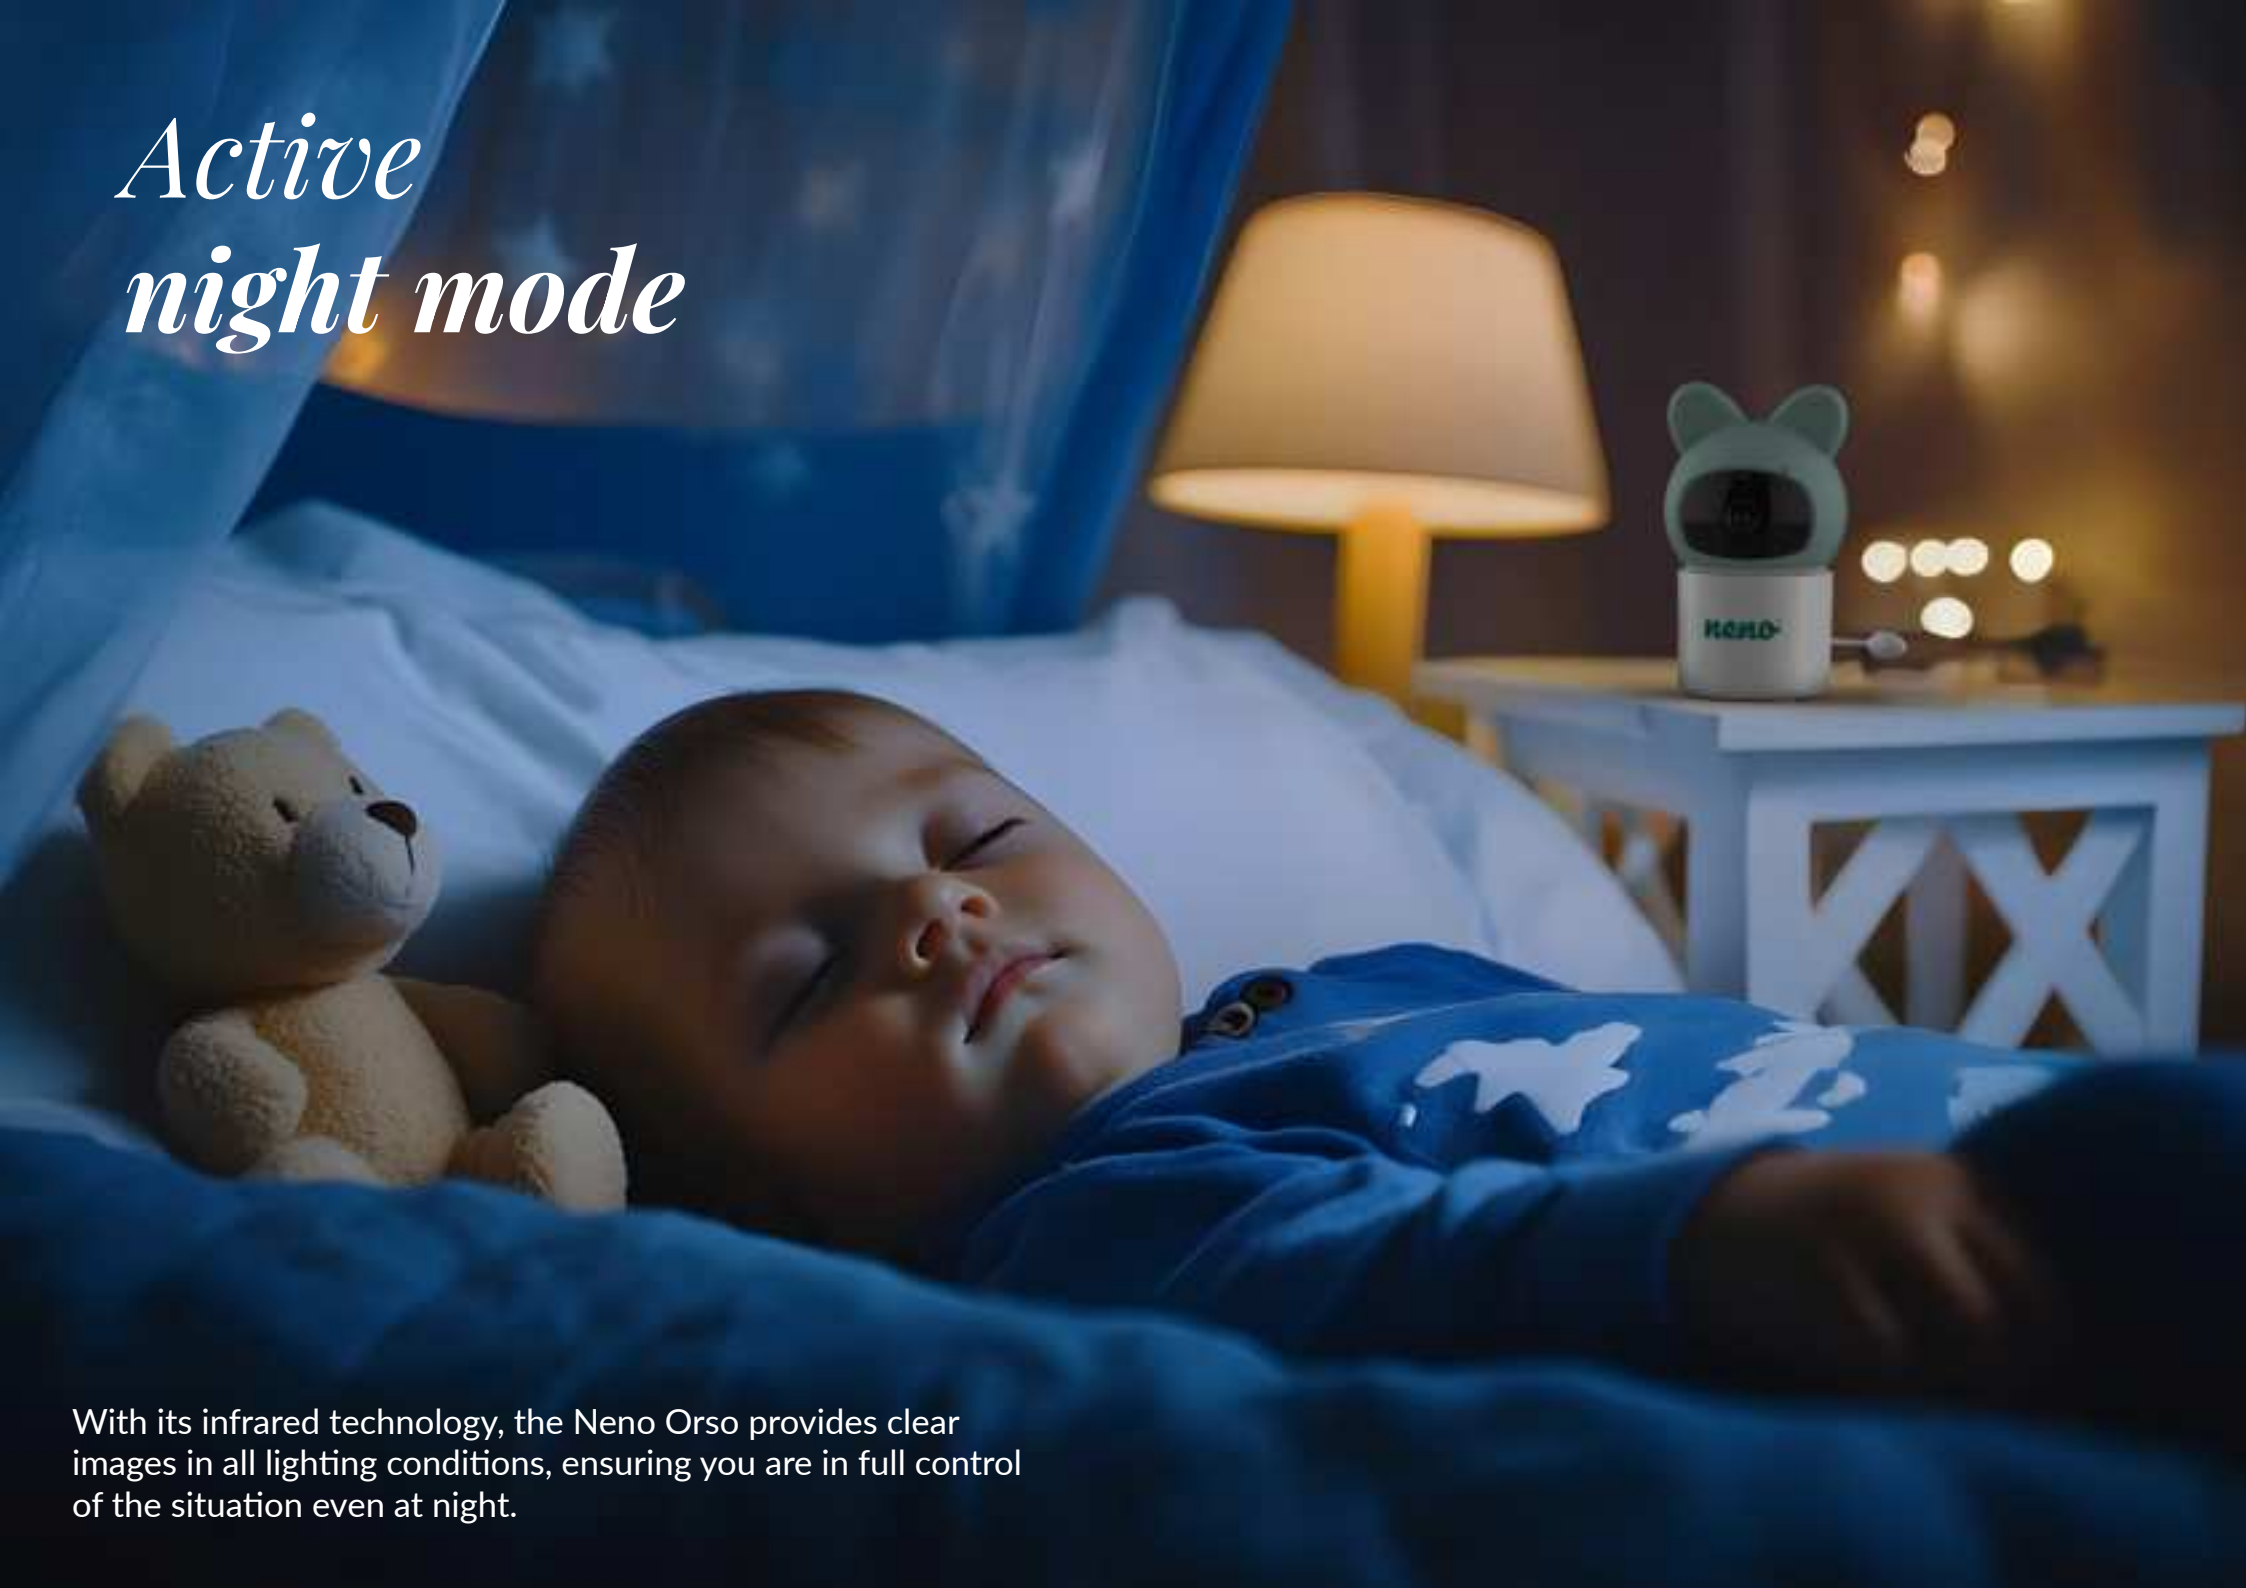
Capture the most beautiful moments by creating a unique album of your child's life! The Neno Orso allows you to save photos and record videos in high quality, so you can go back to the moments you choose at any time.

Use the TUYA app to control

An intuitive mobile app allows you to control the baby monitor from anywhere. You can rotate the camera, start lullabies or check the room temperature. Thanks to the simple interface, managing all functions is quick and convenient, even when you are on the move.

*One product, **two styles***

The Neno Orso baby monitor has two faces. With its silicone topper in the shape of a teddy bear, it brings plenty of charm to a child's room. At the same time, you only have to take it off to discover a sleek, minimalist design that fits into any interior.



Active night mode

With its infrared technology, the Neno Orso provides clear images in all lighting conditions, ensuring you are in full control of the situation even at night.

Easy installation

The ability to be fitted quickly and easily makes the device ready for operation almost immediately and without the need for complicated tools.

Traffic tracking 24/7

The Neno Orso detects your baby's movements and automatically follows them by turning its head. So you can always keep an eye on your little one. And with motion tracking, you get a notification in the app when your baby moves.

6 preloaded ***lullabies***

Create a cosy atmosphere and help your baby fall asleep peacefully.
The Neno Orso has pre-loaded lullabies to gently soothe your little one, promoting peaceful sleep.

Live monitoring

Gain peace of mind by watching your baby in real time. With the live view feature, you can stay on top of things no matter where you are.

Room temperature ***sensor***

With the sensor, you can monitor the temperature, which will help to keep your child's room comfortable for sleep and play.

Swivel angle

355° and 55°

Neno Orso sees everything! The camera rotates both vertically and horizontally, allowing full coverage of the entire room and eliminating so-called blind spot

Childcare ***support***

With an electronic baby monitor, you can look after older children without losing sight of your youngest child. This solution fits perfectly into every parent's multitasking lifestyle.

Different types of assembly

Mount the camera on the wall or ceiling, or attach it to the cot using the headband. The versatility of the mounting means that you can adapt it to any interior.

Multiple applications

The baby monitor will also work well as a stand-alone camera for monitoring pets. Whether you want to keep an eye on your pet or keep your home safe, the device will provide you with the right support.
